(925) 667-1834  
ktcarlb@sandia.gov  
sandia.gov/~ktcarlb  
Principal Investigator  
Extreme-Scale Data Science Department  
Sandia National Laboratories

*My research combines concepts from machine learning, computational physics, and high-performance computing to drastically reduce the cost of simulating nonlinear dynamical systems at extreme scale.*

## Research interests

Model reduction • Machine learning • Computational physics • Deep learning • Dimensionality reduction • Numerical optimization • Uncertainty quantification • High-performance computing

## Positions

May 2019– Aug 2019 **Distinguished Member of Technical Staff**, Sandia National Laboratories, Livermore, CA.

Oct 2014– Apr 2019 **Principal Member of Technical Staff**, Sandia National Laboratories, Livermore, CA.

Oct 2011– Sept 2014 **President Harry S. Truman Fellow**, Sandia National Laboratories, Livermore, CA.

## Education

2006–2011 **Stanford University**, *PhD, Aeronautics & Astronautics*.  
*PhD Minor*: Computational and Mathematical Engineering  
*Adviser*: Charbel Farhat  
*GPA*: 4.15/4.0

2005–2006 **Stanford University**, *MS, Aeronautics & Astronautics*.  
*GPA*: 4.21/4.0  
Ranked 1st in Aeronautics & Astronautics

2001–2005 **Washington University in St. Louis**, *BS, Mechanical Engineering*.  
*GPA*: 4.0/4.0, *summa cum laude*  
Ranked 1st in School of Engineering & Applied Science

## Summary

- 8 research grants funded as Principal Investigator (PI) for \$9.68M total.
- Have directly supervised 11 postdocs, 15 PhD candidates, 2 MS candidates, and 6 BS candidates.
- 29 publications, including
  - #2 most cited paper, 2011, International Journal for Numerical Methods in Engineering: [22]
  - #2 most cited paper, 2013, Journal of Computational Physics: [20]
  - Featured article, June 2015, SIAM Journal on Scientific Computing: [18]
- 3 research fellowships, including the Truman Fellowship at Sandia National Laboratories.
- Model-reduction methods implemented in 3 massively parallel physics simulation codes.
- Ranked first in:
  - Stanford University Aeronautics & Astronautics MS Class of 2006.
  - Stanford University Aeronautics & Astronautics PhD qualifying exams, 2006.
  - Washington University School of Engineering & Applied Science BS Class of 2005.
- 2 keynote lectures, 35 invited talks, 32 conference talks.

## Funding and proposals

- Oct 2018–  
Sept 2021 **Revolutionizing weapons-component design via advanced uncertainty quantification and reduced-order modeling (PI)**, \$1.56M total: \$502K (2019), \$520K (2020), \$541K (2021), Funding source: Sandia National Laboratories' Laboratory-Directed Research & Development.
- Oct 2018–  
Sept 2021 **Rapid high-fidelity aerothermal responses with quantified uncertainties via reduced-order modeling (PI)**, \$1.38M total: \$446K (2019), \$456K (2020), \$474K (2021), Funding source: Sandia National Laboratories' Laboratory-Directed Research & Development.
- Oct 2018– **Agile 'Lego-like' full-system design with domain-decomposition uncertainty quantification and reduced-order modeling (PI)**, \$150K total: \$150K (2019), Funding source: Sandia National Laboratories' Laboratory-Directed Research & Development.
- June  
2016– **Bayesian inference for seismic wave propagation (PI)**, \$250K total: \$100K (2016), \$150K (2017), Funding source: National Nuclear Security Administration, Nonproliferation Research and Development (NA-22).
- Oct 2015–  
Sept 2018 **Subsystem ROM and UQ for rapid, agile, extreme-scale simulation (PI)**, \$1.59M total: \$494K (2016), \$510K (2017), \$581K (2018), Funding source: Sandia National Laboratories' Laboratory-Directed Research & Development.
- Oct 2014– **Rigorous surrogates for quantifying margins of uncertainty (PI)**, \$1.98M total: \$230K (2015), \$275K (2016), \$350K (2017), \$375K (2018), \$750K (2019), Funding source: National Nuclear Security Administration, Advanced Simulation and Computing (ASC), Verification & Validation Methods.
- Oct 2014– **Advanced ROM methods for thermomechanical responses (PI)**, \$1.96M total: \$400K (2015), \$425K (2016), \$338K (2017), \$400K (2018), \$400K (2019), Funding source: National Nuclear Security Administration, Advanced Simulation and Computing (ASC), Verification & Validation Methods.
- Oct 2011–  
Sept 2014 **Real-time analysis and optimization of high-fidelity nonlinear models via model reduction (PI)**, \$810K total: \$260K (2012), \$290K (2013), \$260K (2014), Funding source: Sandia National Laboratories' Laboratory-Directed Research & Development.

## Honors and awards

- 2011–2014 **Truman Fellowship**, Sandia National Laboratories.
- 2008–2010 **National Science Foundation Graduate Research Fellowship**, Stanford University.
- 2008 **CEA-EDF-INRIA Numerical Analysis Summer School Scholarship**, Paris, France.
- 2007 **Nicholas J. Hoff Award**, ranked 1st in graduating MS class of Aeronautics & Astronautics, Stanford University.
- 2006 **Ranked 1st of 16 in Aeronautics & Astronautics PhD qualifying exams**, Stanford University.
- 2005–2008 **National Defense Science and Engineering Graduate Fellowship**, Stanford University.
- 2005 **Gustav Mesmer Prize**, ranked 1st in graduating BS class of Mechanical Engineering, Washington University in St. Louis.

2001–2005 **Calvin L. Woodward Fellowship**, Washington University in St. Louis.

2001–2005 **Danforth Scholarship**, Washington University in St. Louis.

## Research codes

My nonlinear model-reduction techniques are implemented in the following massively parallel computational-mechanics codes:

- **AERO-F**, *Computational fluid dynamics*, Stanford University, *Model-reduction implementation*: K. Carlberg (lead), J. Cortial, C. Bou-Mosleh, D. Amsallem.  
[bitbucket.org/frg/aero-f](http://bitbucket.org/frg/aero-f)
- **Albany**, *Multiphysics finite-element analysis*, Sandia National Laboratories, *Model-reduction implementation*: J. Cortial (lead), K. Carlberg.  
[github.com/gahansen/Albany](https://github.com/gahansen/Albany)
- **SPARC**, *Computational fluid dynamics*, Sandia National Laboratories, *Model-reduction implementation*: J. Fike (lead), K. Carlberg, M. Barone, I. Tezaur.

## Research advising

### Postdoctoral researchers

- Mar 2019– **Yukiko Shimizu**, *Postdoctoral Researcher*, Sandia National Laboratories.  
*Project: Deep learning for multidimensional nonlinear model reduction*
- Aug 2018– **Eric Parish**, *John von Neumann Postdoctoral Fellow*, Sandia National Laboratories.  
*Project: Closure modeling for nonlinear model reduction*
- Aug 2018– **Kookjin Lee**, *Postdoctoral researcher*, Sandia National Laboratories.  
*Project: Deep learning for nonlinear model reduction*
- Sept 2017– **Payton Lindsey**, *Postdoctoral researcher*, Sandia National Laboratories.  
Apr 2018 *Project: Model reduction and machine learning for finite-element multiphysics simulations*
- Aug 2017– **Thomas Catanach**, *John von Neumann Postdoctoral Fellow*, Sandia National Laboratories.  
*Project: Dynamical-system-informed posterior samplers for Bayesian inference*
- May 2016– **Liqian Peng**, *Postdoctoral researcher*, Sandia National Laboratories.  
Apr 2018 *Project: Model reduction for large-scale linear dynamical systems*

- Feb 2016– **Chi Hoang**, *Postdoctoral researcher*, Sandia National Laboratories.  
 Mar 2019 *Project: Subsystem model reduction*
- Dec 2015– **Youngsoo Choi**, *Postdoctoral researcher*, Sandia National Laboratories.  
 Mar 2017 *Project: Space-time least-squares Petrov–Galerkin nonlinear model reduction*
- Sept 2014– **Jeffrey Fike**, *Postdoctoral researcher*, Sandia National Laboratories.  
 Sept 2016 *Project: Model reduction for thermomechanical responses*
- Oct 2012– **Martin Drohmann**, *Postdoctoral researcher*, Sandia National Laboratories.  
 Sept 2014 *Project: Uncertainty quantification for reduced-order models*
- Feb 2012– **Julien Cortial**, *Postdoctoral researcher*, Sandia National Laboratories.  
 Nov 2013 *Project: A Trilinos-based module for nonlinear model reduction*

### PhD candidates

- June 2018– **Philip Etter**, *Stanford University*.  
 Mar 2019 *Project: Online adaptive basis refinement and compression for reduced-order models*
- June 2018– **Ricardo Baptista**, *Massachusetts Institute of Technology*.  
 2018– *Project: Machine learning for uncertainty quantification*
- June–Sept 2017 **Danielle Maddix**, *Stanford University*.  
 2017 *Project: Structure-preserving nonlinear model reduction for compressible fluid dynamics*
- Feb–Sept 2017 **Dennis Grunert**, *University of Stuttgart*.  
 2017 *Project: Non-intrusive least-squares Petrov–Galerkin projection in nonlinear model reduction*
- June 2016– **Zhe Bai**, *University of Washington*.  
 2016– *Project: Non-intrusive Galerkin projection in nonlinear model reduction*
- June–Sept 2016 **Jiahua Jiang**, *University of Massachusetts, Dartmouth*.  
 2016 *Project: Anderson acceleration for domain decomposition methods in uncertainty quantification*
- June–Sept 2016 **Hasan Cagan Ozen**, *Columbia University*.  
 2016 *Project: Bayesian inference in large-scale networks*
- May 2016– **Kookjin Lee**, *University of Maryland*.  
 Jan 2017 *Project: Optimal intrusive uncertainty quantification*
- May 2016– **Sofia Guzzetti**, *Emory University*.  
*Project: Multigrid for accelerating domain decomposition methods in uncertainty quantification*
- May 2016– **Wayne Uy**, *Cornell University*.  
*Project: Bayesian inference with reduced-order-model error surrogates*
- June 2015– **Syuzanna Sargsyan**, *University of Washington*.  
 June 2016 *Project: Reduced-order models for nonlinear compressible fluid dynamics*
- May–Aug 2015 **Katarzyna Swirydowicz**, *Virginia Tech*.  
 2015 *Project: Generalized Krylov-subspace methods for extreme-scale architectures*
- Mar 2015– **Matthew Zahr**, *Stanford University*.  
 Sept 2016 *Project: Optimization under uncertainty with reduced-order models*
- Feb 2015– **Sumeet Trehan**, *Stanford University*.  
 Jan 2017 *Project: Automated construction error surrogates via statistical learning*
- May 2014– **Virginia Forstall**, *University of Maryland*.  
 Sept 2015 *Project: Applying model reduction to Krylov-subspace iterative methods via recycling*

**MS candidates**

- Fall 2010 **Wade Spurlock**, *Stanford University*.  
*Project: Visualizing nonlinear model reduction methods for Formula One car design*
- Fall 2009 **Paul Covington**, *Stanford University*.  
*Project: Implementing shape sensitivity analysis in a massively parallel fluid code*

**BS candidates**

- Sept–Dec 2018 **Anran Lu**, *Stanford University*.  
*Project: Optimization and reduced-order modeling*
- Sept–Dec 2018 **Yiwen Guo**, *Stanford University*.  
*Project: Optimization and reduced-order modeling*
- Apr–Dec 2018 **Remmelt Ammerlaan**, *Stanford University*.  
*Project: A Python library for advanced nonlinear reduced-order modeling*
- Apr–June 2018 **Kexin Yu**, *Stanford University*.  
*Project: A Python library for advanced nonlinear reduced-order modeling*
- Apr–Oct 2015 **Lukas Brencher**, *University of Stuttgart, Germany*.  
*Project: Enabling data-driven time parallelism for reduced-order models*
- Summer 2010 **Matthew Zahr**, *University of California, Berkeley*.  
*Project: Comparing model reduction methods on linear and nonlinear electrical, mechanical, and biological systems. Won “best project” at AHPCRC 2010 Summer Institute.*

**Teaching**

- Summer 2017, 2018 **Instructor and Curriculum Co-Developer**, *Introduction to Mathematical Optimization (short course)*, Institute for Computational and Mathematical Engineering (ICME) Fundamentals of Data Science Summer Workshops, Stanford, CA.
- Summer 2009, 2010 **Instructor and Curriculum Developer**, *Introduction to Engineering Optimization (short course)*, Army High-Performance Computing Research Center Summer Institute, Stanford, CA.
- Spring 2010 **Teaching Assistant**, *Large-Scale Numerical Optimization (CME 338)*, Stanford University, Prof Michael Saunders.
- Fall 2004, Spring 2005 **Teaching Assistant**, *Mechanics of Deformable Bodies (ME 241)*, Washington University in St. Louis, Prof Barna Szabó.

**Service**

- 2019– **Editorial board.**
- *SIAM Journal on Scientific Computing*. January 2019–, *Associate Editor*.
- 2018– **Ph.D. thesis committee member.**
- *Babak Maboudi Afkham*, École Polytechnique Fédérale de Lausanne (EPFL), 2018.  
*Adviser: Prof. Jan Hesthaven.*

2015– **Conference committee member.**

- SIAM Conference on Computational Science and Engineering, Winter 2021, *organizing committee*.
- ICERM Workshop on Algorithms for dimension and complexity reduction, March 16–20, 2020, Providence, Rhode Island, *organizing committee*.
- Model Reduction of Parametrized Systems (MoRePaS) IV, Nantes, France, April 10–13, 2018, *scientific committee*.
- SIAM Annual Meeting, Boston, MA, July 11–15, 2016, *organizing committee*.
- International Conference on Advances in Computational Tools for Engineering Applications, Louaize, Lebanon, July 11–13, 2016, *technical program committee*.

2014– **Workshop organizer.**

- Bay Area Scientific Computing Day, Sandia National Laboratories, Livermore, CA, Dec 7, 2018. *Organizers*: K. Carlberg, K. Sargsyan.
- West Coast ROM Workshop, Lawrence Berkeley National Laboratories, Berkeley, CA, Nov 17, 2017. *Organizers*: K. Carlberg, M. Zahr.
- West Coast ROM Workshop, Sandia National Laboratories, Livermore, CA, Nov 19, 2015. *Organizers*: K. Carlberg, D. Amsallem.
- Bay Area ROM Workshop, Sandia National Laboratories, Livermore, CA, Aug 7, 2014. *Organizer*: K. Carlberg.

2012– **Minisymposium organizer.**

- K. Carlberg and B. Kramer, “Data-augmented reduced-order modeling: operator learning and closure/error modeling,” 2019 SIAM Conf on Comp Sci & Eng, Spokane, Washington, February 25–March 1, 2019.
- K. Carlberg and A. Manzoni, “Reduced-order Modeling Techniques for Large-scale UQ Problems,” 2018 SIAM Conf on Uncertainty Quantification, Garden Grove, California, April 16–19, 2018.
- K. Carlberg and M. Yano, “Model reduction in computational fluid dynamics,” 14th U.S. National Congress on Computational Mechanics, Montréal, Canada, July 17–20, 2017.
- K. Carlberg, F. Lu, and M. Morzfeld, “Numerical methods for uncertainty quantification, surrogate models, and Bayesian inference,” 2017 SIAM Conf on Comp Sci & Eng, Atlanta, GA, February 27–March 3, 2017.

- *Department of Energy Office of Science*
- *Natural Sciences and Engineering Research Council of Canada*
- *Society for Industrial and Applied Mathematics Books*

2016– **John von Neumann Fellowship committee member**, Sandia National Laboratories, Livermore, CA.

2012– **Recruiter**, Sandia National Laboratories, Livermore, CA.

2011 **External examiner for postgraduate courses**, University of Pretoria, South Africa.

## Talks (\* indicates travel support)

### Keynote

1. \* “Enabling UQ with expensive models: nonlinear model reduction and error surrogates,” U2 can UQ showcase, University of Arizona, April 28, 2017.
2. \* “Nonlinear model reduction: discrete optimality,  $h$ -adaptivity, and error surrogates,” Data-Driven Model Order Reduction and Machine Learning, University of Stuttgart, Stuttgart, Germany, March 30–April 1, 2016.

### Invited

1. “Nonlinear reduced-order modeling: Using machine learning to enable extreme-scale simulation for many-query problems,” Scientific Computing and Matrix Computations Seminar, University of California, Berkeley, Berkeley, California, April 17, 2019.
2. \* “Nonlinear model reduction: Using machine learning to enable extreme-scale simulation for time-critical aerospace applications,” Aerospace Computational Design Laboratory, MIT, Cambridge, Massachusetts, February 22, 2019.
3. “Nonlinear model reduction: Using machine learning to enable extreme-scale simulation for many-query problems,” National Energy Research Scientific Computing Center Seminar Series, Lawrence Berkeley National Laboratory, Berkeley, California, February 15, 2019.
4. \* “Nonlinear reduced-order modeling - Using machine learning to enable extreme-scale simulation for many-query problems,” ICERM Workshop on Scientific Machine Learning, Brown University, Providence, Rhode Island, January 29, 2019.

5. \* “Nonlinear reduced-order modeling: Using machine learning to enable extreme-scale simulations in fluid dynamics,” Mechanical Engineering Department Seminar, University of Washington, Seattle, Washington, October 16, 2018.
6. \* “Advances in nonlinear model reduction: least-squares Petrov–Galerkin projection and machine-learning error models,” SAMSI MUMS Opening Workshop, Duke University, Durham, North Carolina, August 20–23, 2018.
7. “Nonlinear model reduction: Using machine learning to enable extreme-scale simulations for many-query and real time problems,” Workshop on Digital Twins and Reduced-Order Models, The Boeing Company, Bellevue, Washington, May 15, 2018.
8. “Nonlinear model reduction: Using machine learning to enable extreme-scale simulations for many-query problems,” Uncertainty Quantification Lab Seminar, Stanford University, Stanford, California, May 3, 2018.
9. \* “Nonlinear model reduction: Using machine learning to enable extreme-scale simulations for many-query problems,” Workshop on Reduced Models for the Cardiovascular System, Emory University, Atlanta, Georgia, April 26–27, 2018.
10. “Nonlinear reduced-order modeling: enabling large-scale physics-based simulations for real-time and many-query problems,” Pixar Research Group Seminar Series, Pixar Animation Studios, Emeryville, California, April 24, 2018.
11. “Reduced-order modeling: using machine learning to enable large-scale simulations for many-query problems,” Advanced Modeling & Simulation Seminar Series, NASA Ames Research Center, Moffett Field, California, March 29, 2018.
12. \* “Breaking computational barriers: using data to enable extreme-scale simulations for uncertainty quantification and design,” SILO Seminar Series, University of Wisconsin, Madison, Wisconsin, October 11, 2017.
13. “Using machine learning to enable extreme-scale simulations for many-query problems,” Aerospace Computing Laboratory Seminar, Stanford University, Stanford, California, August 30, 2017.
14. “Breaking computational barriers: Using data to enable extreme-scale simulations for many-query problems,” Star Talk Seminar Series, Stanford University, Stanford, California, May 22, 2017.
15. \* “Model reduction for nonlinear dynamical systems: discrete optimality and adaptive refinement,” Department of Mathematics Smith Colloquium, University of Kansas, Lawrence, Kansas, May 4, 2017.
16. “Model reduction for nonlinear dynamical systems: discrete optimality and time parallelism,” Mathematical Modelling and Numerical Simulations of Biological Flows Group Seminar, INRIA, Paris, France, November 15, 2016.
17. \* “Nonlinear model reduction: discrete optimality, time parallelism, and error surrogates,” Seminar in Applied Mathematics and Statistics, University of California, Santa Cruz, Santa Cruz, California, October 31, 2016.
18. \* “Breaking computational barriers via nonlinear model reduction,” National Labs Day, University of California, Merced, Merced, California, October 21, 2016.
19. \* “Model reduction for nonlinear dynamical systems: discrete optimality and time parallelism,” Applied and Computational Mathematics Seminar, University of South Carolina, Columbia, South Carolina, October 17, 2016.

20. \* “Nonlinear model reduction: discrete optimality and time parallelism,” Absolventen-Seminar, Numerische Mathematik, Technische Universität Berlin, Berlin, Germany, July 27, 2016.
21. \* “Recent advances in nonlinear model reduction,” Applied Mathematics Seminar, University of Washington, Seattle, WA, Apr 20, 2016.
22. “Nonlinear model reduction: discrete optimality and time parallelism,” Linear Algebra and Optimization Seminar, Stanford University, Stanford, CA, Nov 12, 2015.
23. “Integrating reduced-order models with uncertainty quantification: modeling and controlling error,” FRG Group Seminar, Stanford University, Stanford, CA, June 9, 2015.
24. \* “Statistical modeling and adaptive control of reduced-order-model error in uncertainty quantification,” Numerical Analysis Seminar, University of Maryland, College Park, MD, March 3, 2015.
25. “Modeling and controlling reduced-order-modeling uncertainty in data assimilation,” School of Earth Sciences Seminar, Stanford University, Stanford, CA, Nov 19, 2014.
26. \* “Reduced-order modeling in uncertainty quantification: modeling and controlling error,” Applied and Computational Math Seminar, George Mason University, Fairfax, VA, Apr 25, 2014.
27. “The ROMES method for reduced-order-model uncertainty quantification: application to data assimilation,” Workshop on Model Order Reduction and Data, Paris, France, Jan 6, 2014.
28. \* “Discrete optimality and structure preservation in nonlinear model reduction,” Applied Mathematics Seminar, University of Washington, Seattle, WA, Nov 21, 2013.
29. \* “Model reduction for nonlinear fluid dynamics and structural dynamics: discrete optimality and structure preservation,” Mechanical & Aerospace Engineering Colloquium, Cornell University, Ithaca, NY, Oct 8, 2013.
30. “The GNAT method for model reduction of nonlinear dynamical systems,” Applied Mathematics Seminar, University of California, Berkeley, Berkeley, CA, Oct 2, 2013.
31. \* “The GNAT method for nonlinear model reduction: discrete optimality, practical implementation, and application to CFD,” Department of Mathematics Colloquium, Virginia Tech, Blacksburg, VA, Apr 19, 2013.
32. “Discrete-optimal nonlinear model reduction by the GNAT method,” ACDL Seminar, Massachusetts Institute of Technology, Boston, MA, Apr 17, 2013.
33. “The GNAT method for nonlinear model reduction: overview and perspectives on UQ application,” Uncertainty Quantification Laboratory Seminar, Stanford University, Stanford, CA, May 3, 2012.
34. “The Gauss–Newton with approximated tensors (GNAT) method for nonlinear model reduction,” SUPRI-B Group Seminar, Stanford University, Stanford, CA, June 1, 2011.
35. “Model reduction-based iterative methods for real-time simulation and repeated analyses of mathematical models,” Linear Algebra and Optimization Seminar, Stanford University, Stanford, CA, Oct 28, 2010.

#### Conference (excluding proceedings)

1. “Model reduction of dynamical systems on nonlinear manifolds using deep convolutional autoencoders,” 2019 SIAM Conf on Comp Sci & Eng, Spokane, WA, February 25–March 1, 2019.

2. “Conservative model reduction for finite-volume models in CFD,” 13th World Congress on Computational Mechanics, New York, NY, July 22–27, 2018. *Minisymposium plenary lecture*.
3. “Machine-learning error models for quantifying the epistemic uncertainty in low-fidelity models,” Research Challenges at the Interface of Machine Learning and Uncertainty Quantification, Los Angeles, CA, June 5–7, 2018.
4. “Integrating reduced-order models in Bayesian inference via stochastic error models,” SIAM Conf on Uncertainty Quantification, Garden Grove, CA, April 16–April 19, 2018.
5. “Space–time least-squares Petrov–Galerkin projection for nonlinear model reduction,” MoRePaS IV, Nantes, France, April 10–13, 2018.
6. “Structure-preserving model reduction for finite-volume discretizations of conservation laws,” 14th U.S. National Congress on Computational Mechanics, Montréal, Quebec, Canada, July 17–20, 2017.
7. “Reducing nonlinear dynamical systems via model reduction and machine learning,” USACM Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin, TX, March 23–24, 2017.
8. “Structure-preserving nonlinear model reduction for finite-volume models,” 2017 SIAM Conf on Comp Sci & Eng, Atlanta, GA, January 27–March 3, 2017.
9. “Structure-preserving model reduction for nonlinear finite-volume models,” Workshop on Data-Driven Methods for Reduced-Order Modeling and Stochastic Partial Differential Equations, Banff International Research Station, Banff, Canada, January 29–February 2, 2017.
10. “Structure-preserving model reduction for finite-volume discretizations of conservation laws,” Recent developments in numerical methods for model reduction, Institut Henri Poincaré, Paris, France, November 7–10, 2016.
11. “Adaptive  $h$ -refinement in nonlinear model reduction: capturing moving discontinuities,” 7th European Congress of Mathematics, Berlin, Germany, July 18–22, 2016.
12. “Krylov-subspace recycling via the POD-augmented conjugate gradient method,” SIAM Annual Meeting, Boston, MA, July 11–15, 2016.
13. “Data-driven time parallelism and model reduction,” SIAM Conf on Uncertainty Quantification, Lausanne, Switzerland, April 5–8, 2016.
14. “Applying model reduction to Krylov-subspace recycling: the POD-augmented conjugate-gradient method,” 14th Copper Mountain Conf on Iterative Methods, Copper Mountain, CO, March 20–25, 2016.
15. “Discrete-optimal projection in nonlinear model reduction,” 3rd International Workshop on Reduced Basis, POD and PGD Model Reduction Techniques, Cachan, France, November 4–6, 2015.
16. “Time-parallel reduced-order models via forecasting,” MoRePaS III, Trieste, Italy, October 13–16, 2015.
17. “The ROMES method for statistically quantifying reduced-order model error,” 13th US National Congress on Computational Mechanics, San Diego, CA, July 26–30, 2015.
18. “Discrete optimality in nonlinear model reduction: analysis and application to computational fluid dynamics,” 1st Pan-American Congress on Computational Mechanics, Buenos Aires, Argentina, April 27–29, 2015.

19. “Adaptive  $h$ -refinement for reduced-order models via basis splitting,” 2015 SIAM Conf on Comp Sci & Eng, Salt Lake City, UT, March 14–18, 2015.
20. “Bayesian Inference with Reduced-order Models and Statistical Error Estimates,” SIAM Annual Meeting, Chicago, IL, July 7–11, 2014.
21. “Adaptive  $h$ -refinement for reduced-order models with application to uncertainty control,” SIAM Conf on Uncertainty Quantification, Savannah, GA, March 31–April 3, 2014.
22. “The GNAT method for nonlinear model reduction,” Bay Area Scientific Computing Day, Lawrence Berkeley National Lab, Dec 11, 2013.
23. “The GNAT nonlinear model-reduction method with application to large-scale turbulent flows,” Fourth International Workshop on Model Reduction in Reacting Flows (IWMRRF), San Francisco, CA, June 19–21, 2013.
24. “Preserving Lagrangian Structure in Nonlinear Model Reduction,” 2013 SIAM Conf on Comp Sci & Eng, Boston, MA, February 25–March 1, 2013.
25. “A forecasting method for decreasing the temporal complexity in implicit, nonlinear model reduction,” MoRePaS II, Gunzburg, Germany, October 2–5, 2012.
26. “The GNAT method for nonlinear model reduction: recent developments and application to large-scale models,” 10th World Congress on Computational Mechanics, São Paulo, Brazil, July 8–13, 2012.
27. “Decreasing the temporal complexity in nonlinear model reduction,” 2012 SIAM Conf on Uncertainty Quantification, Raleigh, NC, April 2–5, 2012.
28. “Efficient Model Reduction of Large-Scale Nonlinear Systems in Fluid Dynamics,” 2011 SIAM Conf on Comp Sci & Eng, Reno, NV, February 28–March 4, 2011.
29. “Nonlinear model reduction using Petrov–Galerkin projection and data reconstruction,” 2010 SIAM Annual Meeting, Pittsburgh, PA, July 13, 2010.
30. “A proper orthogonal decomposition-based augmented conjugate gradient algorithm for nearby problems,” 2009 SIAM Annual Meeting, Denver, CO, July 7, 2009.
31. “An adaptive POD–Krylov reduced-order modeling framework for repeated analyses problems,” 2009 Joint ASCE–ASME–SES Conf on Mechanics and Materials, Blacksburg, VA, June 27, 2009.
32. “A POD-based iterative solver for fast structural optimization,” Seoul National University–Stanford University Student Joint Workshop, Stanford University, Stanford, CA, June 18, 2009.
